

Contract and Project Management - Capability Statement

Our Contract and Project Management Program assists with council's project, contractual and emergency management outcomes.

CT Management's procurement, tendering, contract, and project management support focuses on providing solutions to satisfy your time, budget, risk, project management and compliance pressures.

Our well-developed processes and procedures will ensure successful outcomes for Council.

Success begins with a clear vision and detailed scope. It ends with us delivering your project – on time and on budget.

Our Services

Emergency Management Services

- Our service covers emergencies such as bushfire, flood, drought and our systems will cater for a smooth transition in the recovery phase of your community.
- We also follow-up with a full update of Councils Asset register including renewal rates, photographs and all component particulars and a review of your Council' renewal demands.

Project Management

- Our Associate team is highly skilled in project management, having significant experience over extended periods of time with Council projects including roads, bridges, drainage and buildings.

Contract Management and Procedures

- CT Management Group has expertise in all elements of contract management.
- From the project scope, specifications, tendering, award, variation management through to handover.

Our capability and capacity in Contract and Project Management has develop over 27 years across large and small projects in a broad range of settings.
